

## About Me

Vincent Liang 6A (12)

Hello, my name is Liang Muk Yin. You can call me Vincent. I am studying at Confucian Tai Shing Primary School. I am eleven years old.

There are three people in my warm family. My dad is a project manager. He is creative and he always shares his project to cultivate my creativity. My mum is a housewife. She likes doing exercise so she always takes me to have a run at the weekends.

Conducting experiments is my favourite hobby because I can discover interesting chemical reactions every time. I am interested in reading and running too, because they can make me feel relax. My favourite subject is STEM because we can do experiments together and learn science and technology in class. I find science is magical after I have STEM lessons.

I am easy-going. I complete all my tasks with effort. My classmates like playing with me because I am always kind to them. I want to be a scientist in the future because I want to create new inventions to help other people. I have won a lot of awards. For example, I won the First Runner-Up in the Greater Bay Area STEM Excellence Award 2020 (Hong Kong) and the First Runner-Up in the China Youth Science Video Festival (Hong Kong) 2020. I welcome all these challenges and I learn to be creative, caring and considerate at the same time.

Thank you for listening!
